

Foundation for Our Future

Capital Program

Foundation for Our Future is a \$25 million investment over the next three years to resolve hundreds of long delayed and critically needed repairs and renovations to our infrastructure.

The Foundation program will take advantage of historically low interest rates to issue bonds and leverage money to fix problems that will only get worse and cost taxpayers more if they are neglected.

Foundation for Our Future is dedicated to fixing our current assets, not paying for new ones. The program will focus primarily on these needs throughout Louisville Metro:

Transportation

- Roads and Streets
- Sidewalks and Curbs
- Bridges
- Guardrails
- Traffic Signals

Safety and Security

- Firehouses
- Police Stations
- Security Systems
- Emergency Generators
- Community Emergency Warning System

Government Buildings

- Roofs
- Elevators
- Electrical Systems
- Heating/Cooling Systems
- Wheelchair Ramps
- Accessible Walkways

Community Assets

- Swimming Pools
- Playground Equipment
- Athletic Facilities
- Park Shelters/Clubhouses
- Trees and Landscapes
